TEST CASE ID	TITLE	CATEGORY	EXPECTED RESULT
TC-001	Display dashboard for user with valid access	Positive	Dashboard loads successfully and all expected data visualizations are displayed correctly without errors
TC-002	All visualizations render correctly	Positive	Each visualization matches the design specifications and displays the correct data values
TC-003	Access denied for user without dashboard permission	Authorization	System shows an authorization error message and prevents access to the dashboard
TC-004	Redirect to login when session has expired	Authorization	User is redirected to the login page with a message indicating session expiration
TC-005	Dashboard handles large data set without performance degradation	Edge	Dashboard loads within acceptable time (< 3 seconds) and all visualizations render correctly, scrollbars function, and UI remains responsive
TC-006	Dashboard loads under slow network conditions	Edge	A loading indicator is displayed, and the dashboard completes loading within the defined performance threshold (e.g., < 5 seconds) without timing out
TC-007	Backend service error handling	Negative	Dashboard shows a user-friendly error message (e.g., "Unable to load data. Please try again later.") and does not crash the application
TC-008	Dashboard load time meets performance requirement	Non-Functional	Dashboard load time is less than 2 seconds on a standard broadband connection
TC-009	Responsive layout on different screen resolutions	Non-Functional	All dashboard elements reflow appropriately, remain readable, and no content is clipped or overlapped
TC-010	Dashboard displays correct data after role change	Authorization	Dashboard is accessible and displays data specific to the newly assigned consultant role
